

API Security Assessment - *Virtual Guardian Solution Brief*

Understand Your Organizational Risks

Discover how your organization is equipped to deal with securing your APIs. Work with our experts to discover where your organization can focus efforts to maximize your API security and reduce risk.

API ASSESSMENT AREAS

The coverage of our API Security Assessment includes the tools, processes, and architecture that support your API Governance, Management, and Visibility capabilities.

Assessment Deliverables

- ✓ Summary of API Asset Landscape
- ✓ Overview of API Security Capabilities

- ✓ Identified High-Risk Areas or Notable Gaps
- ✓ Next Steps Security Recommendations

Our in-depth API Security Audit & Scorecard service is also available, covering your API Development practices & offering a more comprehensive discovery audit.

Our Approach

Using the NIST Cyber Security Framework, our team structures our discovery questions around the pillars.

Our experts will highlight where your organization may be risking its customer data, proprietary information, and business operations due to process and tooling weaknesses related to your APIs, identifying any notable gaps.
